Shoulder Care Program

From 9/21/26 (5x per week) (2x per day)

Pulley Shoulder Flexion

Patient Specific Exercise Directions:

Stand or sit with your back facing the wall that is holding the pulleys and grab a pulley in each hand.

Pull your uninvolved arm down to stretch the involved arm and shoulder up. Keep your involved arm completely relaxed and let the uninvolved arm do all the work. Hold for the specified period of time. You should not feel any pain in your involved arm arm.

Repeat for the desired number of reps.

Standing Shoulder Flexion Wall Slides- Standing Arm Lengthener at Wall

Exercise Directions:

Stand with your shoulder about 2 feet from the wall. Raise your arm to shoulder level and gently slide your hand up the wall as high as you can. Lengthen your arm by pulling your rib cage up and away from your pelvis. Hold for 3 to 5 seconds. Then relax with your arm still in the "up" position. "Lengthen" your arm again, then return it to your side. Repeat with the other arm and go back and forth.

Patient Specific Exercise Directions:

Setup:

Begin in a feet together stance position with one hand resting on a wall.

Movement:

Stand with your shoulder about 2 feet from the wall. Raise your arm to shoulder level and gently slide your hand up the wall as high as you can. Lengthen your arm by pulling your rib cage up and away from your pelvis. Hold for 3 to 5 seconds. Then relax with your arm still in the "up" position. "Lengthen" your arm again, then return it to your side. Repeat with the other arm and go back and forth.

Shoulder Pendulum with Forward and Back Movement

Patient Specific Exercise Directions:

Stand with a chair directly in front of you, lean forward to allow your uninvolved to rest on the seat for support.

Slowly shift your body weight forward and back to give your involved arm enough momentum to swing, keeping your involved arm completely relaxed.

Repeat for the desired number of reps.
